Product Description

Therminol 54 is a synthetic fluid designed to provide reliable, consistent heat transfer performance over a long service life at maximum bulk temperatures up to 280°C (540°F). Therminol 54 fluid is designed for use in non-pressurized/low-pressure, indirect heating systems. It delivers efficient, dependable, uniform process heat with no need for high pressures.

Performance Benefits

- **Excellent pumpability**—Therminol 54 supports operations with temperatures lower than possible with many other mineral oils.
- **Non-sludge-producing chemistry**—The use of Therminol 54 enables life-cycle operational cost efficiencies, including optimal pump seal life, fewer system cleanings between refills, and superior fluid life.
- **Excellent resistance to fouling**—Because Therminol 54 is a synthetic fluid, it resists the effects of oxidation 10 times better than mineral oils.
